

# Yumna Waris

**Date of birth:** 21 Apr 2001 | **Place of birth:** Karachi, Pakistan | **Nationality:** Pakistani | **Gender:** Female |

**Phone number:** (+92) 3356910909 (Mobile) | **Email address:** [yumnaahwaris@gmail.com](mailto:yumnaahwaris@gmail.com) | **Website:**

<https://yumnawaris.github.io/yumna-portfolio/>

## ABOUT ME

Passionate Software Engineer with a strong foundation in building data-intensive and scalable systems, particularly in the payment technology domain. I bring hands-on experience in designing secure, event-driven architectures and leading impactful projects that merge software engineering with intelligent decision-making. Recognized for problem-solving and innovation (Hackathon Winner 2022), I thrive in collaborative, research-oriented environments. My goal is to advance expertise in intelligent software systems and contribute to developing next-generation AI-driven solutions with global impact.

## WORK EXPERIENCE

 **PLATFORMFACTORY.IO** – SANTA MONICA, UNITED STATES

**Business or Sector** Financial and insurance activities | **Department** Engineering | **Email** [yumna@platformfactory.io](mailto:yumna@platformfactory.io) |

**Website** <https://www.payengine.co/>

**SOFTWARE DEVELOPER ENGINEER II** – 13 JUL 2023 – CURRENT

- Lead the design and development of microservices for secure payment processing, including integrations with gateways and subscription management systems.
- Take full ownership of services from architecture to deployment, implementing scalable containerised solutions and building critical features such as automation of merchant onboarding, underwriting, invoicing, and fraud detection.
- Contributed to automation through payment emulators using n8n and delivered data-driven insights via AWS Quicksight dashboards.

 **PLATFORMFACTORY** – SANTA MONICA, UNITED STATES

**Business or Sector** Financial and insurance activities | **Department** Engineering Team | **Email** [yumna@platformfactory.io](mailto:yumna@platformfactory.io) |

**Website** <https://www.payengine.co/>

**SOFTWARE DEVELOPER INTERN** – 13 FEB 2023 – 13 JUL 2023

- Supported front-end and back-end development in a microservices architecture, focusing on bug fixes, debugging, and applying best practices in scalable system design.
- Gained practical experience in secure payment workflows and software engineering standards.

## EDUCATION AND TRAINING

1 JAN 2020 – 31 DEC 2023 Karachi, Pakistan

**BS IN SOFTWARE ENGINEERING** University of Karachi

**Website** <https://www.uok.edu.pk/faculties/computerscience/index.php> |

**Field of study** Software and applications development and analysis , Computer use , Database and network design and administration , Information and communication technologies not elsewhere classified

**Final grade** 3.66 | **Level in EQF** EQF level 6

## LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s):

|         | UNDERSTANDING |         | SPEAKING          |                    | WRITING |
|---------|---------------|---------|-------------------|--------------------|---------|
|         | Listening     | Reading | Spoken production | Spoken interaction |         |
| ENGLISH | C1            | B2      | B2                | B2                 | C1      |

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

## SKILLS

---

### Programming Languages

JavaScript | Python (computer programming) | Java (computer programming) | C, C++ C#

### Web App Development

HTML | CSS | Bootstrap | SaaS | React JS | Node JS | Express JS | Flask | PostgreSQL | SQL | Spring Boot | Mongo DB

### Artificial Intelligence and Machine Learning

Data Analysis | Data Visualization | Data Cleaning | Supervised Algorithms | Artificial Neural Network | Unsupervised Algorithms | Langchain | LangGraph | Agentic AI | Prompt Engineering | n8n

### Soft Skills

work as a team | think analytically | communication | planning and management

## PROJECTS

---

3 MAR 2023 – CURRENT

### Nexprobiz GEN - Digital Accountant

---

**Nexprobiz GEN – Digital Accountant** is a financial accounting software project initially developed as part of an accounting course to streamline bookkeeping tasks. The system enables users to create ledgers, record transactions, and automatically generate financial reports and closing statements, reducing manual effort and minimizing errors. Later, the project was enhanced with **agentic AI and LangGraphs**, introducing automation features that intelligently manage routine processes and improve financial insights. This evolution demonstrates how **traditional accounting workflows can be reimaged with modern AI techniques, bridging finance, technology, and intelligent automation.**

1 JAN 2023 – 31 DEC 2023

### LearnScope - Academia Assistant

---

**LearnScope – Academia Assistant** is an advanced learning portal designed with dedicated roles for administrators, professors, and students, offering the full functionality of a modern Learning Management System (LMS). Beyond standard features, it introduces a unique layer of intelligence by integrating **LLMs, LangChain, and LangGraph** to assist in academic content generation. Professors can automatically create course descriptions, outlines, lecture materials, and even exam questions, transforming the platform into more than just an LMS. With this AI-driven approach, **LearnScope evolves into a smart academic assistant that reduces administrative workload and empowers professors to focus on teaching and student engagement.**

## CERTIFICATIONS

---

### Fundamentals of Backend Engineering

---

Understand backend communication design patterns, protocols, execution and proxying

Link <https://www.udemy.com/certificate/UC-070ad4bc-b3ab-414e-8006-82bfcb127d18/>

### Mastering PostgreSQL: Learning By Real Examples

---

A Complete Guide to Practical PostgreSQL

Link <https://www.udemy.com/certificate/UC-c7ef6389-3546-499f-8bd6-107e5c99b179/>

### Machine Learning Specialization

---

#### Course Certificates Completed

Supervised Machine Learning: Regression and Classification

Advanced Learning Algorithms

Unsupervised Learning, Recommenders, Reinforcement Learning

Link <https://coursera.org/share/c6cdc13031cff7b4755ef5c68c10e578>

### LangChain- Develop AI Agents with LangChain & LangGraph

---

Learn LangChain and LangGraph by building real world AI Agents (Python, Latest Version 0.3.0+)

Link <https://www.udemy.com/course/langchain/learn/lecture/50656113?start=255#notes>
